Free Dog Walking Spreadsheet: how to use it

Start here:

Yellow cells are yours to fill in. Green-grey cells hold formulas: leave them alone and they fill themselves.

The example file is filled with fictional data so you can see every number working. The blank file is the same workbook, empty: use that one.

Google Sheets: File > Import > Upload the .xlsx (or open it from Google Drive), then File > Save as Google Sheets. Excel: just open it (Excel 2010 or newer). Numbers on Mac also opens it.

Set up (5 minutes):

1. Settings: your walk types and prices (30 minute walk, 60 minute walk, group walk, puppy visit) and the year (D2).

2. Dogs: one row per client: owner, dog, address or key notes, usual walk. Walks, revenue, tips and money owed fill in.

3. Walks: one row per walk: date, dog, walk type. The price comes from your price list; type a different price only if you charged something else. Add the tip and mark Paid Yes or No.

What you get:

Dashboard: walks, revenue and tips by month, revenue by walk type, and the money you are still owed. Unpaid walks show red.

Limits: 100 dogs and 600 walks. Need packages, expenses, profit and a tax set-aside? See the paid Pet Sitting & Dog Walking Business Tracker at tuper.app/templates. This is a record-keeping tool, not tax advice.
