Free Pet Sitting Spreadsheet: how to use it

Start here:

Yellow cells are yours to fill in. Green-grey cells hold formulas: leave them alone and they fill themselves.

The example file is filled with fictional data so you can see every number working. The blank file is the same workbook, empty: use that one.

Google Sheets: File > Import > Upload the .xlsx (or open it from Google Drive), then File > Save as Google Sheets. Excel: just open it (Excel 2010 or newer). Numbers on Mac also opens it.

Set up (5 minutes):

1. Settings: edit your services and prices (up to 10) and the year (D2).

2. Clients: one row per client: name, pets, notes (vet, key, feeding). Bookings, revenue and money owed fill in.

3. Bookings: one row per job: date, client, service, how many visits or nights. The price comes from your price list; type a price in the override column to charge something else. Mark Paid Yes or No.

What you get:

Dashboard: bookings and revenue by month, revenue by service, money you are still owed. Clients: who books most and who owes you. Unpaid bookings show red.

Limits: 100 clients, 400 bookings, 10 services. Need expenses, profit and a tax set-aside? See the paid Pet Sitting & Dog Walking Business Tracker at tuper.app/templates. This is a record-keeping tool, not tax advice.
